# Contents of Volume 115

Number 1, January 1989

<b>The Mechanism of Paraffin Reactions on HY Zeolite</b> J. Abbot and B. W. Wojciechowski .....	1
<b>Characterization of Pt/<math>\gamma</math>-Alumina Catalysts Containing Ceria</b> J. Z. Shyu and K. Otto .....	16
<b>Activated Formation of a H-CO Complex on Ni/<math>\text{Al}_2\text{O}_3</math> Catalysts</b> Paul G. Glugla, Keith M. Bailey, and John L. Falconer .....	24
<b>On the Surface Chemistry of Molybdena-Alumina Catalysts Prepared from <math>\text{Mo}(\text{CO})_6</math></b> Jose Goldwasser, S. M. Fang, Marwan Houalla, and W. K. Hall .....	34
<b>Mechanism of Carbon Filament Growth on Metal Catalysts</b> R. T. Yang and J. P. Chen .....	52
<b>Metal-Support Effects on the Intramolecular Selectivity of Crotonaldehyde Hydrogenation over Platinum</b> M. Albert Vannice and B. Sen .....	65
<b>Selective Synthesis of Dimethylamine over Small-Pore Zeolites. III. H-ZK-5</b> R. D. Shannon, M. Keane, Jr., L. Abrams, R. H. Staley, T. E. Gier, and G. C. Sonnichsen .....	79
<b>Simulation of Transport and Self-Diffusion in Zeolites with the Monte Carlo Method</b> Eberhard Aust, Klaus Dahlke, and Gerhard Emig .....	86
<b>The Effect of Oxygen Surface Groups of the Support on Platinum Dispersion in Pt/Carbon Catalysts</b> C. Prado-Burguete, A. Linares-Solano, F. Rodríguez-Reinoso, and C. Salinas-Martínez de Lecea .....	98
<b>An Infrared Study of the Influence of CO Adsorption on the Topology of Supported Ruthenium</b> Frigyes Solymosi and János Raskó .....	107
<b>Chemistry of Supported Ru: CO-Induced Oxidation of Ru at 310 K</b> John L. Robbins .....	120
<b>Evidence of Alloy Formation during Reduction of Platinized Tin Oxide Surfaces</b> Steven D. Gardner, Gar B. Hoflund, Mark R. Davidson, and David R. Schryer .....	132
<b>Oxygen Adsorption on a Potassium-Promoted Ag Catalyst</b> M. Dean and M. Bowker .....	138
<b>Selective Synthesis of Dimethylamine over Small-Pore Zeolites. IV. Effects of <math>\text{SiO}_2</math> and <math>\text{Al}_2\text{O}_3</math> Coatings</b> H. E. Bergna, M. Keane, Jr., D. H. Ralston, G. C. Sonnichsen, L. Abrams, and R. D. Shannon .....	148
<b>Pillared-Clay Catalysts Containing Mixed-Metal Complexes. I. Preparation and Characterization</b> Woo Y. Lee, Rasik H. Raythatha, and Bruce J. Tatarchuk .....	159
<b>Physical, Adsorptive, and Catalytic Properties of Platinum Supported on Silica Modified with Europium Oxide</b> Beth A. Milligan and J. A. Dumesic .....	180
<b>NMR Studies of <math>^{65}\text{Cu}</math> and <math>^{133}\text{Cs}</math> in Alkali-Metal-Promoted Copper Catalysts</b> Po-Jen Chu, B. C. Gerstein, G. R. Sheffer, and T. S. King .....	194
<b>Characterization and Catalysis of Pt-Cu Clusters in NaY</b> Giuliano Moretti and Wolfgang M. H. Sachtler .....	205

<b>The Effect of Re, S, and Cl on the Deactivation of Pt/<math>\gamma</math>-Al<sub>2</sub>O<sub>3</sub> Reforming Catalysts</b> S. M. Augustine, G. N. Alameddine, and W. M. H. Sachtler .....	217
<b>A Temperature-Programmed Desorption Study of Olefin Oligomerization in H-ZSM-5</b> T. J. Gricus Kofke and R. J. Gorte .....	233

## Notes

<b>Coadsorption of Ammonia and the Other Bulky Bases on Aluminium Phosphate</b> Hidenobu Itoh, Akio Tada, Hideshi Hattori, and Kozo Tanabe .....	244
<b>Isotopic Exchange of Carbon Dioxide and Its Interaction with Carbon Monoxide over Copper Catalysts</b> S. David Jackson .....	247
<b>Effect of Promoters on Benzene Hydrogenation over Fused Iron Catalysts</b> G. W. Norval and M. J. Phillips .....	250
<b>Electron Energy Loss Studies of Propylene Interactions in US-Y Faujasites</b> G. W. Zajac, T. H. Fleisch, B. L. Meyers, G. J. Ray, and J. T. Miller ..	254
<b>Effect of Samarium on the Thermal Stability and Activity of the Mn/Ag Catalyst in the Oxidation of CO</b> S. Imamura, S. Yoshie, and Y. Ono .....	258
<b>Stoichiometric Adsorption Complexes in H-ZSM-5, H-ZSM-12, and H-Mordenite Zeolites</b> T. J. Gricus Kofke, R. J. Gorte, G. T. Kokotailo, and W. E. Farneth ...	265
<b>Structure of Rhodium Particles in a Rh/Al<sub>2</sub>O<sub>3</sub> Model Catalyst as Studied by X-Ray Photoelectron Diffraction</b> K. Tamura and Y. Nihei .....	273
<b>Catalytic Functionalities of Supported Tungsten Sulfide Catalysts</b> K. Saiprasad Rao and G. Murali Dhar .....	277
<b>On the Existence and Role of Free Radicals in Methanol Conversion to Hydrocarbons over HZSM-5. I. Inhibition by NO</b> Clarence D. Chang, Stuart D. Hellring, and Judith A. Pearson .....	282

## Letter to the Editors

<b>The Mechanism of Alkane Hydrogenolysis</b> Geoffrey Bond .....	286
--	-----

## Book Review

<b>Characterization of Porous Solids.</b> Edited by K. Unger, J. Rouquerol, K. S. W. Sing, and H. Kral W. Keith Hall .....	289
---	-----

Number 2, February 1989

<b>Catalytic Properties of Postsynthesis Phosphorus-Modified H-ZSM5 Zeolites</b> Hannelore Vinek, Gerd Rumpelmayr, and Johannes A. Lercher .....	291
<b>Gold Catalysts Prepared by Coprecipitation for Low-Temperature Oxidation of Hydrogen and of Carbon Monoxide</b> M. Haruta, N. Yamada, T. Kobayashi, and S. Iijima .....	301
<b>The Decomposition of Unsaturated Hydrocarbons on Small Pd Particles</b> W. G. Durrer, H. Poppa, and J. T. Dickinson .....	310

<b>Acid Attack Theory of Dealumination in Cation-Exchanged Faujasite</b>	
Jong Taik Kim, Myung Chul Kim, Yasuaki Okamoto, and Toshinobu Imanaka	319
<b>Hydroformylation of Allyl Alcohol Using Homogeneous <math>\text{HRh}(\text{CO})(\text{PPh}_3)_3</math> Catalyst: A Kinetic Study</b>	
R. M. Deshpande and R. V. Chaudhari	326
<b>Kinetic Studies for Elucidation of the Promoter Effect of Alkali in Fischer-Tropsch Iron Catalysts</b>	
Klaus Herzog and Johann Gaube	337
<b>On the Influence of Sulfur on the Platinum/Iridium Bimetallic Catalysts in <i>n</i>-Hexane/Hydrogen Reactions</b>	
M. J. Dees and V. Ponec	347
<b>Effect of Oxidation-Reduction Cycling on <math>\text{C}_2\text{H}_6</math> Hydrogenolysis: Comparison of Ru, Rh, Ir, Ni, Pt, and Pd on <math>\text{SiO}_2</math></b>	
S. Gao and L. D. Schmidt	356
<b>The Effect of a Coverage-Dependent Heat of Adsorption on Temperature-Programmed Desorption and Adsorption in Porous Catalysts</b>	
A. R. Balkenende, J. W. Geus, A. J. H. M. Kock, and R. J. van der Pas	365
<b>Potassium's Promotional Effect of Unsupported Copper Catalysts for Methanol Synthesis</b>	
Gordon R. Sheffer and Terry S. King	376
<b>Mechanistic Study on the Alcohol Synthesis over Molybdenum Catalysts. Addition of Probe Molecules to <math>\text{CO-H}_2</math></b>	
Takashi Tatsumi, Atsushi Muramatsu, Kohshiroh Yokota, and Hiro-o Tominaga	388
<b>The Synthesis of Butyronitrile from <i>n</i>-Butanol and Ammonia over Rhodium (111) and (331) Single-Crystal Surfaces</b>	
B. M. Naasz, I. Böszörményi, and G. A. Somorjai	399
<b>Selective Synthesis of Dimethylamine over Small-Pore Zeolites: Catalytic Selectivity and Sorption Behavior</b>	
Lloyd Abrams, Michael Keane, Jr., and George C. Sonnichsen	410
<b>Designing Zeolite Catalysts for Size- and Shape-Selective Reactions: Selective Hydrogenation of Acetylene in the Presence of Butadiene and Ethylene</b>	
David R. Corbin, Lloyd Abrams, and Cristobal Bonifaz	420
<b>EPR of Perylene Radicals Adsorbed on Alumina and Silica-Alumina Powders. I. The Matrix Effects</b>	
K. S. Rothenberger, H. C. Crookham, R. L. Belford, and R. B. Clarkson	430
<b>Acid and Catalytic Properties of Nonstoichiometric Aluminum Borates</b>	
Kevin P. Peil, Laurine G. Galya, and George Marcelin	441
<b>The Effect of Oxygen on the Conversion of Light Paraffins on ZSM-5 Zeolites</b>	
Gabriele Centi and Giorgio Golinelli	452
<b>Characterization of Aluminophosphate Surfaces via <math>^{29}\text{Si}</math> CP/MAS NMR</b>	
S. M. Wharry, S. J. Martin, and M. P. McDaniel	463
<b>Microstructure of Pt-Rh Particles on <math>\text{SiO}_2</math></b>	
T. P. Chojnacki and L. D. Schmidt	473
<b>Kinetics of NO Reduction by CO over Supported Rhodium Catalysts: Isotopic Cycling Experiments</b>	
Byong K. Cho, Brent H. Shanks, and James E. Bailey	486
<b>Cyclohexene Adsorption and Reactions on Clean and Bismuth-Covered Pt(111)</b>	
José A. Rodriguez and Charles T. Campbell	500

<b>Catalytic Reactions of <i>n</i>-Dodecane on Aluminosilicates</b>	
J. Abbot and B. W. Wojciechowski .....	521
<b>Infrared Diffuse Reflectance Study of the Silicon-Rich H-ZSM-5 Catalysis of Ethanol Conversion</b>	
William R. Moser, Chen-Chou Chiang, and Robert W. Thompson .....	532
<b>Effects of Dispersion and Partial Reduction on the Catalytic Properties of Rh/Al<sub>2</sub>O<sub>3</sub> Catalysts in the Steam Reforming of Mono- and Bicyclic Aromatics</b>	
G. Delahay and D. Duprez .....	542
<b>Formation of Products Responsible for Motor and Research Octane of Gasolines Produced by Cracking. The Implication of Framework Si/Al Ratio and Operation Variables</b>	
A. Corma and A. V. Orchillés .....	551
<b>Effect of Chlorine in the Formation of PtRe Alloys in PtRe/Al<sub>2</sub>O<sub>3</sub> Catalysts</b>	
P. Malet, G. Munuera, and A. Caballero .....	567
<b>Hydrodenitrogenation Activity and Selectivity of Well-Dispersed Transition Metal Sulfides of the Second Row on Activated Carbon</b>	
Marc J. Ledoux and Brahim Djellouli .....	580
 <i>Notes</i>	
<b>On the Reactivity of Spillover Hydrogen</b>	
S. J. Teichner .....	591
<b>Surface Propagation Speed of Kinetic Phase Transition in the Catalytic Oxidation of Carbon Monoxide over Platinum Thin Films</b>	
J.-P. Dath and J. P. Dauchot .....	593
<b>Chemisorption of Neopentane in Zeolites Studied by UV-Vis Spectroscopy</b>	
I. Kiricsi, H. Förster, Gy. Tasi, and P. Fejes .....	597
 <i>Letters to the Editors</i>	
<b>IR Spectra of CO Adsorbed on Metals: Comments on the Paper "On the Electronic Competition Effect upon CO Adsorption on Metals" by H. A. C. M. Hendrickx, C. des Bouvrie, and V. Ponec</b>	
M. N. Bredikhin and Yu. A. Lokhov .....	601
<b>Orientation of Hydrocarbon Chains in Molecular Sieve 5A: Additional Evidence for Effects of Surface Curvature</b>	
R. V. Jasra and S. G. T. Bhat .....	605
<b>Answer to the Letter by Bredikhin and Lokhov</b>	
H. A. C. M. Hendrickx, C. des Bouvrie, and V. Ponec .....	607
<b>Comments on "The Mechanism of Isobutane Cracking over Amorphous and Crystalline Silicoaluminates" by E. A. Lombardo and W. K. Hall</b>	
George M. Kramer and Gary B. McVicker .....	608
<b>In Reply to Kramer and McVicker</b>	
W. Keith Hall, E. A. Lombardo, and J. Engelhardt .....	611
<b>Author Index for Volume 115</b> .....	616

The Subject Index for Volume 115 will appear in the December 1989 issue as part of a cumulative index for the year 1989.

## INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

**Submission of Manuscripts.** Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller  
Department of Chemical Engineering  
P.O. Box 2159 Yale Station  
Yale University  
New Haven, Connecticut 06520

Professor Frank S. Stone  
School of Chemistry  
University of Bath  
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

**Form of Manuscript.** Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and an address to which proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

**Notes and Letters to the Editor** may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

**Units of weights, measures, etc.,** when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Système International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m<sup>-2</sup>." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry*, 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

**Footnotes** should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

**Tables** should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

**Figures** should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for photoreproduction. No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Drawings should be made with India ink on tracing linen, good quality tracing paper, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Lettering should be large enough to be legible after a reduction of 50–60%. Illustrations in color can be accepted only if the authors defray the cost.

**References** to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

1. McVicker, G. B., Kramer, G. M., and Ziemiak, J. J., *J. Catal.* **83**, 286 (1983).
2. Klier, K., in "Advances in Catalysis" (D. D. Eley, H. Pines, and P. B. Weisz, Eds.), Vol. 31, p. 243. Academic Press, New York, 1982.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

**Proofs.** Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

**Reprints.** Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.

*An International Forum in Computer Science . . .*

# Journal of Parallel and Distributed Computing

Editors-in-Chief: **Kai Hwang**

*University of Southern California, Los Angeles*

**Leonard Uhr**

*University of Wisconsin, Madison*

This international journal is directed to researchers, engineers, educators, managers, programmers, and users of computers who have particular interests in parallel processing and/or distributed computing. The *Journal of Parallel and Distributed Computing* publishes original research papers and timely review articles on the theory, design, evaluation, and practices of parallel and/or distributed computing systems.

The journal provides an effective forum for communication among researchers from various scientific fields working in a wide variety of problem areas and sharing a fundamental common interest in improving the ability of computers to solve increasing numbers of difficult and complex problems as quickly and as efficiently as possible.

## Research Areas Include

- Theory of parallel/distributed computing
- Innovative computer architectures
- Supercomputers and numerical methods
- Concurrent programming requirements
- Parallel algorithms and implementations
- Language, software, and compiler techniques
- Computer networks and protocols
- Multicomputers and distributed processing
- Artificial intelligence machines
- Applications and performance analysis
- Optical computing and neural networks
- New technologies and future trends

Volume 5 (1988), 6 issues

ISSN 0743-7315

In the U.S.A. and Canada: \$123.00

All other countries: \$160.00

Sample copies and privileged personal subscription rates are available.

**ACADEMIC PRESS, INC.**, Journal Promotion Dept.  
1250 Sixth Avenue, San Diego, CA 92101, U.S.A. (619) 230-1840

**"...An awesome work of scholarship."**

—CHICAGO TRIBUNE

## Encyclopedia of Physical Science and Technology

editor-in-chief **Robert A. Meyers**  
TRW, Inc., Redondo Beach, California

"...a landmark of specialized publishing, a massive magnum opus from one of the world's most distinguished spreaders of the scientific word... Its very presence is newsworthy and awesome, as is the list of its advisers and contributors, including Nobel laureates Linus Pauling, S. Chandrasekhar, Vladimir Prelog, Abdus Salam, Glenn Seaborg, Kai Siegbahn and Edward Teller."

—CHICAGO TRIBUNE

In the short time since its publication, the **Encyclopedia of Physical Science and Technology** has become the contemporary scientific reference for today's technology. From MIT to the Kennedy Space Center to IBM, thousands of academic, industrial, and public libraries are finding that they can't be without this detailed, authoritative, and comprehensive reference work.  
1987, 15-volume set including index, \$2,500.00

### Announcing the 1989 Encyclopedia Yearbook

To keep your set of the **Encyclopedia of Physical Science and Technology** the most up-to-date reference for years to come, Academic Press will begin publishing yearbook volumes in December 1988. Each Yearbook will feature several articles examining new, fast-emerging areas of study or offering the latest information on topics already in the **Encyclopedia**.

December 1988, 706 pages, \$165.00 ISBN: 0-12-226916-0

## Encyclopedia of Astronomy and Astrophysics

Accurate, up-to-date, and highly informative, the **Encyclopedia of Astronomy and Astrophysics** covers a dynamic area of science in one 770-page volume. Responding to the dramatic changes occurring in these fields, an array of expert practitioners present concise views of topics ranging from Cosmology and Cosmic Inflation to Pulsars, Star Clusters, and Solar Physics.  
November 1988, 770 pages, \$49.95 (tentative)  
ISBN: 0-12-226690-0

## Encyclopedia of Telecommunications

This authoritative, 550-page reference contains the latest advances in telecommunications technology—technology that will affect all of us during the next few decades. Internationally recognized experts have written articles to give you information on leading-edge research and engineering applications, on topics ranging from Fiber Optics to Intelligent and Computer Networks to Speech and Signal Processing.  
November 1988, 550 pages, \$49.95 (tentative)  
ISBN: 0-12-226691-9
